Yanbu, Saudi Arabia

Objective

Seeking a challenging environment which can enhance my analytical abilities, critical thinking and thereby providing me plenty of opportunities to grow along with it and become proficient in many upstream applications.

Work experience

Associate Degree co-op training, Jan.2016 –Sep.2016

Saline Water Conversion Corporation, Yanbu

I've been practicing for three months in the controlling room, and through it I've been able to work on controlling machines and notice the changes in the tubes and the tanks, I was helping with notes, writing and suggestions. In the last month I went to the lab and had my experience in the Ph tests and analysis of treated water and detection the properties.

Education

BSc- Chemical Engineering Technology, Graduation on March.2019

Yanbu Industrial College, Yanbu

Associate Degree in Chemical Engineering, 2014-2016

Yanbu Industrial College, Yanbu

Skills and Achivments
